

THE FORIS AG

FORIS AG stands for legal expertise in the founding and transferring of shelf companies. As an industry leader, we have founded AGs, GmbHs, KGs and GmbH & Co. KGs across Germany since 2001 - and since its introduction we have also offered the legal form Societas Europaea (SE - European joint-stock company). All companies are equipped with the full statutory capital and have not exercised any business activities as of the sale date. Any inherited risks are thus precluded. Companies and founders can acquire and kick-start many of these company types within 24 hours.

THE PRINCIPLE OF THE SHELF COMPANY

Whoever does business always carries a liability risk for their actions. In the worst case, even the entrepreneur's entire private assets can be at stake. However, there are effective measures that protect private assets. Whoever conducts business in the form of a company limits their liability up to the respective company's share capital. FORIS Gründungs GmbH establishes such companies with limited liability in Germany and Austria. These companies can be acquired with immediate effect. This brings many advantages for entrepreneurs. For attorneys, our shelf companies make it possible to rapidly implement complex transactions.

- › All companies are ready for action: Agreements can be closed immediately.
- › Our clients can thus avoid any personal liability from the outset.
- › All companies are entered in the commercial register and have not undertaken any business activity. The share capital is fully paid up, and the companies are guaranteed to not have any debts or liabilities.
- › The legal instruments are assessed by attorneys and fulfil the current legal stipulations.

The offer of FORIS shelf companies includes the following legal forms: AGs, GmbHs, GmbH & Co.KGs, German entrepreneurial companies (UGs), Societas Europaea (SEs) (European joint-stock company).
